Crisp and  
fruity! Rich  
berries Tropical  
fruit tones!

An aluminium can is one of the best containers for wine on board; it's lightweight, performs well under pressure and is easily recyclable. As the air pressure changes on an aircraft, packs can expand and contract. With cans, they stay completely sealed throughout the journey. There's no light or air exposure due to expansion and contraction. Each delicious drop stays perfectly preserved ready for you to enjoy. Cheers!
